COMPUTER SYSTEM REQUIREMENTS

Windows:

Isaac 5.x is not compatible with Windows XP or older

Windows 7, 8, 10

128MB RAM memory

HOW TO INSTALL “ISAAC FOR WINDOWS” SOFTWARE

Isaac 5.x is not compatible with Windows XP or older

Windows (Windows 7, 8 and 10)

1) Download the latest version of Isaac for Windows software here:

<https://velocomp.com/isaac-software-installation/>

2) If you’re installing Isaac for Windows on a Windows 10 computer, make sure your security settings in Windows 10 allow for correct installation. More information is available here:

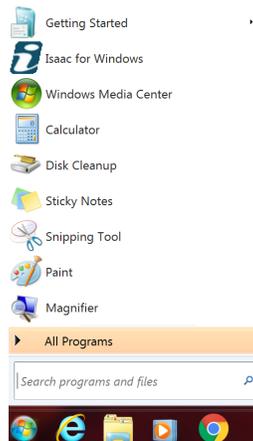

<https://velocompforum.com/viewtopic.php?f=35&t=5380>

3) Install Isaac 5.x+ software

4) Plug in your USB cable to your PC. Connect the other end of the cable to your PowerPod/Newton, and **make sure your PowerPod/Newton is turned on.**

A series of messages will appear telling you that your USB drivers have been installed successfully.

Once your Isaac software is installed (and USB drivers, if necessary), click on the Start button. You’ll see the Isaac for Windows icon in your menu:

To learn more about Isaac operation, download the Isaac Instruction manual here:
